

# WisDOT 2024-2029 STP-Urban Program Application

NOTE:

This application is required for <u>each</u> new potential 2024-2029 program cycle project. Please review the application instructions (see link below) to assist you in

completing the application.

Project Sponsor: City of Schofield Facility Owner: City of Schofield

**STP-Urban Application Instructions** 

Population Category: 50,000 to 200,000

# **Project Description**

Project Location:	
Municipality: City of Schol	field County: Marathon
On Route: Ross Ave	
At Route (Start): <b>Scho</b> f	field Ave Offset: 0 (tenths of a mile)
Toward Route (End): P	Pine
Is the project a planning, admithe type of project and provide	inistration, or other non-infrastructure project?  Yes  No If yes, please select e a brief explanation: <b>SELECT</b>
-	showing the project location. A WISLR map is REQUIRED (refer to the following link) v/Pages/doing-bus/local-gov/wislr/default.aspx
Length of Project: <b>0.5</b> (tenths	of a mile)
Average Daily Traffic (ADT): 57	ADT Year: 2019 Posted or Statutory Speed Limit(s): 25 (mph)
Functional Classification: Minc	or Arterial
NOTE: Roadway must be fund	ctionally classified as a <u>Collector or higher</u> to be eligible for funding.

Any federal-aid-eligible structures within the existing facility?  Yes No If yes, please indicate the structure ID
#(s):
Does a railroad facility exist within 1000 feet of the project limits? 🖂 Yes 🔲 No If yes, specify:
At-grade Crossing
Owner of Railroad facility Foxy / Watco
NOTE: If there are any pertinent railroad considerations, design funds may be included for Railroad Review Costs.
Known Safety Issues? 🖂 Yes 🔲 No If yes, specify: pedestrian crossing inside of signals (consider applying for
Highway Safety Improvement Program [HSIP] funds if applicable)
Is this project within a F4R site?  Yes No If YES, a completed 23 CFR 667 Resiliency Scope Certification form
and a copy off the completed evaluation must be submitted with this application.
NOTE: Refer to the following link, Facilities Repeatedly Requiring Repair and Reconstruction (F4R)
https://wisconsindot.gov/Pages/doing-bus/local-gov/astnce-pgms/highway/f4r.aspx

## **Project Justification**

Explain why the project is needed, including the scope and appropriate detail on the project's uniqueness and complexity. Describe specific deficiencies such as pavement cracking, edge raveling, surface deterioration, substandard geometrics, etc. Include and separately identify any 100% locally funded components of the project that are part of the overall improvement.

The 0.5 mile stretch of Ross Ave from Business Highway 51 (Schofield Ave) to Metro Drive is a minor arterial with an average daily traffic loading of 5,600 cars per day. This stretch of roadway runs east to west and connects the City of Schofield and Village of Weston. Aside from a vertical sag curve at the intersection with Schofield Ave, the roadway is relatively flat with no horizontal curves. The project area is made up of two quarter mile segments which are separated by an at grade railroad crossing. The west segment services a highly industrialized area and provides access to many businesses that utilize heavy truck traffic. The east segment has mostly residential properties directly adjacent to it, however it also serves as a major access route to another heavy industrialized area located to the norther of Ross Ave.

The existing roadway has two 17-foot-wide lanes with curb and gutter. There is 4-ft wide sidewalk on both sides of the road through the length of the project, the west segment has a concrete terrace, and the east segment has a grass terrace. The last major reconstruction project was completed in 2005 where a majority of the pavement and base course was replaced. Since that time, the city has conducted a crack sealing project in 2018 along with other small projects to maintain the roads' serviceability. At this point, Ross Ave is seeing transverse and alligator cracking and is beginning to show signs of rutting. Before these issues turn into larger problems, the city plans to replace the base course, pavement, curb and gutter, sidewalks, and all other ancillary items for the full 0.5 mile stretch.

As a part of the Ross Ave corridor, there are several segments of storm sewer, sanitary sewer, and watermain. To maintain proper drainage and to ensure the system keeps operating properly, the city is applying for funding assistance to install new storm sewer inlets, manholes, and pipes.

Independently of the federally assisted roadway project, the city intends to supply funding for improvements to local water and sewer utilities. The sanitary sewer trunkline is in good condition due to continued efforts from the city, however the manholes are showing signs and deterioration and require replacement. The watermain is undersized and requires additional work to be able to accommodate future growth in the area.

As mentioned earlier, there is a railroad crossing that separates the east and west segments. Preliminary discussions with WisDOT indicates that no major work needs to be done at this area aside from some minor sidewalk adjustments and standard coordination.

If approved for funding, the city plans to request qualifications from local engineering firms to complete a more extensive analysis of the roadway and determine the extent of repairs needed. The firm will also ensure that all lane widths, shoulder widths, ditches, and side slopes will meet applicable standards.

# **Proposed Improvement**

NOTE: Applicants should refer to the traffic data and design standards information in the instructions prior to completing this section of the application.				
Improvement Type: Reconstuction If Combination, explain: Overall Length: 2900 (feet)				
Rural Cross Section Length: (tenths of a mile)				
☐ Urban Cross Section Length: <b>0.5</b> (tenths of a mile)				
Will the project add lanes? Yes No If Yes, describe which part(s) of the project will receive additional lanes:				
Grading: Minimal Moderate Extensive				
New Pavement Type: Hot Mix Asphalt If Combination, explain: Width: 32-36 Length: 2900				
New Shoulder Type: <b>Gravel</b> If Combination, explain: Width: Length:				
Sidewalk One side or both: <b>both</b> Width: <b>5</b> Length: <b>5800</b>				
Are bicycle/pedestrian accommodations required as part of a local or regional plan?   Yes No If yes, specify:				
<ul> <li>Curb and Gutter Length: 5800</li> <li>Signals Location:</li> <li>Roundabout Location:</li> <li>NOTE: Refer to FDM 11-26 for modern roundabout information</li> <li>(http://wisconsindot.gov/rdwy/fdm/fd-11-26.pdf).</li> <li>Railroad improvements</li> <li>Lighting: SELECT Lighting Style: SELECT</li> <li>Beam Guard</li> <li>Permanent and Temporary Pavement Marking</li> <li>Permanent and Temporary Signing</li> <li>Storm Sewer</li> </ul>				
Structure Structure Type: SELECT Work Required: SELECT				
Structure #(s): Sizes and Descriptions:				
Traffic Management During Construction: Road Open with Staged Construction				
Do you anticipate submittal of an exception to standards request?   Yes No				
If yes, please describe:				

### **Low-Risk Project Delivery Model**

WisDOT, in collaboration with the Federal Highway Association and Wisconsin counties, is continuing the efforts to reduce cost by streamlining delivery and oversight processes on low complexity Local Projects through the development of the Low-Risk Project Delivery Model.

More information on the low-risk delivery model can be found here: <a href="https://wisconsindot.gov/Pages/doing-bus/local-gov/lpm/lowrisk-program.aspx">https://wisconsindot.gov/Pages/doing-bus/local-gov/lpm/lowrisk-program.aspx</a>

#### **Key Program Requirements Confirmation**

Please confirm your understanding of the following project conditions by typing your name, title and initials in the boxes at the bottom of this page. A Head of Government/Designee with fiscal authority for the project sponsor, not a consultant, must initial below AND sign the next page of this application.

- a. All Federal Funding will be limited at the estimate amount unless an increase is approved by WisDOT. Additional costs incurred over the limit will be 100% the responsibility of the project sponsor.
- b. A federally funded design project must be tied to a construction project. Stand alone design projects are no longer eligible for funding (this does not apply to MPO area projects).
- c. Only new projects may apply, existing projects are ineligible for additional funds through the new cycle process. Existing projects requiring additional funds are encouraged to use the existing Project Change and Cost Increase processes.
- d. Federally-funded projects must be designed in accordance with all applicable federal design standards (even if the design for a federally-funded project was 100% locally funded).
- e. The sponsor must provide matching dollar funding of at least 20% of project costs.
- f. The sponsor must not incur costs for any phase of the project until that phase has been authorized for federal charges and the WisDOT Region has notified the sponsor that it can begin incurring costs. Otherwise, the sponsor risks incurring costs that will not be eligible for federal funding.
- g. As the work progresses, the state will bill the project sponsor for work completed which is not chargeable to federal funds. Upon completion of the project, a final audit will be made to determine the final division of costs. If reviews or audits show any of the work to be ineligible for federal funding, the project sponsor will be responsible for any withdrawn costs associated with the ineligible work.
- h. The project sponsor will pay to the state all costs incurred by the state in connection with the improvement that exceed federal financing commitments or are ineligible for federal financing. In order to guarantee the project sponsor's foregoing agreements to pay the state, the project sponsor, through its duly authorized officers or officials, agrees and authorizes the state to set off and withhold the required reimbursement amount as determined by the state from any moneys otherwise due and payable by the state to the municipality.
- i. If the project sponsor should withdraw the project, it will reimburse the state for any costs incurred by the state on behalf of the project.
- j. For 100% locally funded design projects, costs for design plan development and state review for design are 100% the responsibility of the local project sponsor. Project sponsors may not seek federal funding for only state review for design projects.

- k. The sponsor agrees to state delivery and oversight costs by WisDOT staff and their agents. These costs include review of design and construction documents for compliance with federal and state requirements, appropriate design standards, and other related review. These costs will vary with the size and complexity of the project. The sponsor agrees to add these costs to the project under the same 80% federal and 20% local match requirements.
- I. Transportation construction projects using federal funds except sidewalks, are likely general improvements that primarily benefit the public at large and for which special assessments cannot be levied under s. 66.0703, Wis. Stats. Municipalities desiring to obtain the required local project funding through special assessments levied against particular parcels should seek advice of legal counsel. See Hildebrand v. Menasha, 2011 WI App 83.

I confirm that I have read and understand project conditions (a) through (I) listed above:

Name: Mark Thuot Title: Director of Public Works

Accepted (please type your initials here): MT

# **Contact Information and Signatures**

Application prepared by a consultant?	Yes	No If yes, consultant information and signature required below.
Consultant Company Name:	Company L	Location (City, State):
Consultant Signature (electronic only)	:	Date:

**NOTE:** It is **not permissible** for a consultant to fill out applications gratis (or for a small fee) for a municipality and then be selected to do the design work on a project **unless** the municipality either:

- a. uses a one-step QBS process with the scope of work to include the grant application and the design services, if authorized; or
- b. uses a two-step QBS process with the scope of work for the first selection for the preparation of the grant application(s) and the second selection for the actual design(s).

In both cases, all costs incurred prior to WisDOT project authorization are the responsibility of the municipality.

See FDM 8-5-3 for additional information: http://wisconsindot.gov/rdwy/fdm/fd-08-05.pdf
