The four-year totals indicate that estimated funding is reasonably expected to be available in comparison to programmed expenditures for the 2025-2028 TIP. There are a few instances where programmed funding appears to exceed estimated available funding when comparing amounts from year to year. In general, this can be attributed to differences in applied inflation rates between revenue and expenditures. There are also instances where projects have been selected and programmed in the previous TIP, but have not yet been completed and remain in the TIP but do not require additional funding (such as transit capital projects). For NHPP funding, this could be attributed to larger projects, such as freeway reconstruction projects, programmed by WisDOT in the four years of the TIP that can be authorized using Advance Construction allowance from FHWA or funded through alternate funding sources not indicated within this fiscal constraint report. Additionally, the years in the TIP represent calendar years but the State fiscal year runs from July 1 of a year to June 30 of the following year. Depending on what proportion of available Federal funding is scheduled in the two halves of the State fiscal year, it could appear that more funding is being scheduled for obligation than what is estimated for a particular calendar year.
